Excellent stability

Window profiles are made of top quality Rehau primary plastics.

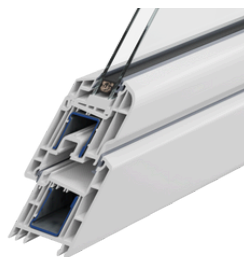

Time-tested system

Profi I with a depth of 70 mm and a unique composition of 5 insulation chambers.

EURO 70 LINE

Basic design with straight sash.

EURO 70 DESIGN

Brilliant design sash with integrated gutter rail function.

The windows are made with gray or black stop seals, the glazing rails in the interior are beveled. Standard glazing is provided using double insulation glazing. We produce windows of the EURO 70 series in rectangular, slanted and arched shapes and in all color variants. SULKO window and door frames are very easy to maintain thanks to the high-quality and smooth High-Definition-Finishing. This technology ensures high resistance of the surface of plastic profiles against pollution and eliminates the aggressive effects of the surrounding environment.
