Flat and round sash

Choose a straight or designer sash.

Designed for the best glass

This system glazes both double and triple glazing.

Wide profile with 6 and 7 chambers

It consists of 7 chambers in the frame and 6 chambers in the sash.

SYNEGO LINE

Elegant straight sash for modern buildings.

SYNEGO DESIGN

Design sash with an integrated gutter rail function.

Synego windows with a construction depth of 80 mm and a height of 117 mm guarantee excellent thermal, acoustic and structural insulation properties. The windows are made with three sealing layers in gray and black colors, and the glazing beads are beveled on the interior. Standard glazing is provided by double or triple glazing. SULKO window and door frames are very easy to maintain thanks to the high-quality and smooth High-Definition-Finishing finish.
